+ Relieves
+ Moistens
+ Protects

Also suitable for children from infancy, as well as during pregnancy and nursing period.

Natural. Effective. Free from Side-Effects.
No Habituation Effect.

Multi-talent Nose

A Body part with many skills

Breathing, smelling, and protecting – this is the shortcut of the variety of tasks that our nose has to master each day. Because the nose is involved in three vital body functions:

- **Breathing**
- **Sense of smell**
- **Immune defence**

On average, adults inhale and exhale **9 litres air in just 1 minute** through their nose. Whilst breathing the nose makes sure that the air reaches the substantially more sensitive regions of pharynx and bronchi at a pleasant temperature between **31 – 34 degrees Celsius**. At the same time the nose makes us recognise what is in the wind: **Special olfactory cells in the upper part of the nose sensitise for aromatic- and harmful substances.**

However, our perhaps most characteristic body part is capable of even more. As outpost of the immune system, the nose **cleans the inhaled air of viruses, bacteria, and foreign matter**. Thus, a healthy nasal mucosa is of centrality. With the help of secret and countless cilia **the nose relieves itself from foreign bodies.**

Our nose fulfills many functions and plays a central part in our well-being. Applicable to many areas of our health:

NOSE IS WELL – EVERYTHING IS WELL

Easily inhaling and exhaling with Rhino-Pflüger®

Nose is infected, has a cold, is blocked, or too dry?

Here, Rhino-Pflüger NASAL SPRAY helps completely naturally and without side effects, by moistening and cleansing the nose. It contains a unique mixture of selected minerals.

The isotonic saline solution (Sodium chloride 0.9%) is the moisturising foundation and the **5 minerals geared to each other**, in accordance with Schüssler's Biochemistry, are **the big PLUS**

CALCIUM PHOSPHATE	regenerates
FERRUM PHOSPHATE	anti-inflammatory
POTASSIUM CHLORIDE	purifying
POTASSIUM SULPHATE	cleansing
MAGNESIUM PHOSPHATE	supports lymphatic drainage

In comparison to hypertonic solutions, **Isotonic Nasal Sprays** have the advantage of long-term use. Hypertonic nasal sprays have an increased salt content and therefore cause dehydration of the nasal mucosa when used for a longer period of time.

One for Everyone

Rhino-Pflüger® NASAL SPRAY helps noses of all ages. Its natural active complex is ideal from infancy as well as for adults. RHINO-PFLÜGER® NASAL SPRAY can also be used during pregnancy and nursing period without any concerns.

Rhino-Pflüger® NASAL SPRAY – without Preservatives

Thanks to its **innovative spray system** this nasal spray manages without preservatives. A special 3K-airfilter protects the 15 ml solution from contamination and guarantees maximal security. Therefore, after opening, RHINO-PFLÜGER® NASAL SPRAY has the same longevity and exactly the same efficacy as conserved remedies. Hence no reason to burden the nose any further.

Due to the natural composition and the specifically attuned mineral complex for the nose RHINO-PFLÜGER® NASAL SPRAY is a great choice at any age.

The easy Way for a clear Nose

Natural. Effective. Free of side effects. Without Habituation Effect.

Rhino-Pflüger® NASAL SPRAY can be used from infancy up to old age.

Recommended Dosage:

- ✓ Children under 2 years receive 1 puff in each nostril several times a day as required.
- ✓ Children over the age of 2 and adults receive 1 – 2 puffs in each nostril (1 puff = 0.14 ml) several times a day as required.

Rhino-Pflüger® NASAL SPRAY is suitable for long-term administration.

Good to know:

With correct administration of Rhino-Pflüger® NASAL SPRAY there are no known contraindications, interactions, or side effects.

Little Hygiene Advice:

After use, wipe spray head and replace cap. Rhino-Pflüger® NASAL SPRAY should not be used longer than 6 weeks after first use.

Furthermore, your Nose appreciates ADDITIONAL SUPPORT

- ✓ **Drink sufficient** because water keeps the mucous membranes lubricated and the nasal secretion thin.
- ✓ Care for a **pleasant indoor climate** and avoid dry air (air conditioning or heating can be a trigger)
- ✓ **Regular Nasal Douche** cleanses the nose and flushes pathogens – for instance use a pinch of salt in 1 cup of lukewarm water.
- ✓ **Lots of exercise in fresh air** stimulates circulation and strengthens the immune system.
