

THE CLINICAL SCIENCE OF BIOCHEMIC THERAPY Dr. (med) W.H Schüssler

Dr. W.H. Schüssler

The Clinical Science of Biochemic Therapy, accorded to Dr. Schüssler, is a scientifically proven, evidence-based therapy and a Continuing Education Module for Doctors, Dentists, Chemists and Veterinary Surgeons and associated modalities in the EU

CPE Points applicable

COURSE OUTCOME

- The fundamentals of Biochemistry accorded to Dr. Schüssler
- Thorough understanding of the 12 minerals
- Learn how to recognise mineral deficiencies using signs and symptoms
- The use of and the art of Facial Diagnostics
- Treatments - Prescriptions - Doses; and the important aspect of detecting why there are deficiencies of these essential elements.
Treat the cause not the symptoms
- Physiological aspect of the elements in their Structural, Electrochemical, metabolic, Catalytic and Miscellaneous roles
- Cation and Anion bonding pairs
- Absorption and Assimilation
- The Value of Arndt Schultz Law in considering the prescription
- The role and effects of the mineral salts in the process of osmosis, and how this can positively affect the absorption and assimilation of both Homoeopathic, Allopathic and alternative therapeutic treatments

Revision Students Only

Learn how the supplementary minerals #13-27 in conjunction with the minerals #1-12, or on their own, can assist you to achieve your patient health outcomes. This will be taught on the final day.
(Does not apply to NSW & ACT courses)

The Clinical Science of Biochemic Therapy Includes:

The Basic Principles

The foundation of Biochemistry was laid more than a century ago by Rudolph Virchow, one of the foremost scientists of the day. He discovered that the human body is composed of an enormous number of tiny, living cells. Each cell is made up of an infinitesimal but perfectly balanced quantity of three classes of materials - water, organic substances and inorganic substances. Water and organic matter such as sugar, albuminous and fatty substances make up the greater portion of the body. The inorganic (mineral) elements, although present in much smaller quantities are the vital elements. They are the active workers which utilize the inactive substances in building the millions of cells that the body is composed of. The life of these cells is of short duration - millions are constantly breaking down and new ones are just as rapidly being built up, providing there is a constant supply of the necessary material for this continuous rebuilding process.

Dr. Schüssler's Therapy

Dr. Schüssler determined that these inorganic substances are present in the body of compounds (mineral salts) and named twelve principal compounds which he called "tissue salts". He defined the types of disease (symptoms) arising from a deficiency of each tissue salt. With this knowledge he was able to prescribe with great accuracy and effect. Dr. Schüssler studied the function of each of the twelve tissue salts and was able to define the type of disorder caused by the disturbance of the physiological balance of each tissue salt.

- Biochemischer Bund Deutschland e.V (BBD)
- European Institute for Biochemistry of Dr. Schüssler
- International Institute of Complementary Therapists (IICT)
- Australian Traditional Medicine Society (ATMS)

Facial Diagnostic Includes:

In depth facial diagnostics skills, interpreting facial signs including lines, shadows and shines, psychological signs, in accordance with the evidence based proven and recognised methods of the German School of Facial Diagnostics.

Presented by

Alex Sutton

B.Sc., B.A, B.Bus., B.App.Sci

Biochemist: Practicing the Clinical Science of Biochemic Therapy - in accordance with the teachings of Dr. Schüssler and the principles and policies of the Biochemischer Bund Deutschland (German Association of Biochemistry (BBD)) - and the European Institute of Biochemistry

Alex studied biochemistry both in the United Kingdom and Germany, specializing in the area of "inorganic elements" after working for many years in Germany at the request of the BBD he took up appointment as Chairperson of the Asia Pacific Branch of the BBD.

Alex lectures extensively throughout the world and is highly regarded as one of the foremost experts on the subject of Inorganic Biochemistry and the works of Dr. Schüssler. Conducting private clinics throughout the Asia Pacific Region, Scandinavia, EU, UK and UAE.

Details

The Clinical Science of Biochemic Therapy
incorporating Facial Diagnostics Seminar
\$900

Students attending revision, an
administrative fee of **\$40** per day applies

**Early Bird Special
\$810**

Registration & Payment by 2nd July 2026

Dates 13, 14, 15, 16 August 2026

Location Warragul VIC 3820

Venue Mercure Hotel
23 Mason Street

Important Information

- Lectures are from 9am – 5pm daily
- The "Clinical Science of Biochemic Therapy", exam of 2 hours duration will take place on the final day – commencing at 1pm
- All textbooks will be supplied. Students need to bring personal notebooks & writing implements
- Morning and afternoon tea will be provided
- Lunch: A variety of restaurants and/or take-a-aways are located less than 10 minutes away, or BYO
- Revision Students Only - #13 - 27 will be taught on the final day

For further information:
